

Mir Faizaan Sajjad

Srinagar, India | mir_faizaan@outlook.com | +91 8494017539 | linkedin.com/in/mir-faizaan-sajjad-8834821a7

PROFESSIONAL SUMMARY

Security Operations Specialist with 2+ years in 24x7 SOC environments, specialising in P1/P2 incident response, detection engineering, SIEM administration, and threat hunting. Led major incident investigations spanning NTLM brute force, DDoS, and crypto-mining malware. Hands-on with Microsoft Sentinel, IBM QRadar, Splunk, Carbon Black Cloud, and Defender XDR. Experienced in SOAR automation via Sentinel Playbooks and IBM Resilient. Audits L1 and L2 analyst tickets to ensure investigation quality, SLA adherence, and documentation standards. Mentors junior analysts and maintains SOC knowledge bases to drive team consistency and operational maturity.

EDUCATION

B.Tech in Computer Science (Hons. Cloud Computing) — Amity University, Noida 2019 – 2023

EXPERIENCE

Security Specialist — SOC, Incident Response & Detection Engineering Sept 2023 – Present
Orange Business (Orange Cyber Defense), Gurgaon

- Lead P1/P2 incident response across multi-tenant managed environments — NTLM brute force, DDoS, and crypto-mining malware — covering detection, triage, containment, eradication, RCA, and post-incident review with structured documentation for stakeholders.
- Audit L1 and L2 analyst tickets to ensure investigation quality, documentation accuracy, SLA compliance, and adherence to SOC procedures across customer accounts; provide corrective feedback and coaching where required.
- Develop and tune production-grade detection rules across Microsoft Sentinel, IBM QRadar, and Splunk, mapped to MITRE ATT&CK, validated against live telemetry to reduce false positives and improve alert fidelity.
- Automate triage and response workflows via Microsoft Sentinel Playbooks and IBM Resilient, including IOC enrichment, alert correlation, and containment actions, reducing analyst workload and mean time to respond.
- Conduct proactive monthly threat hunting across cloud (AWS/Azure), endpoint, network, and identity telemetry using hypothesis-driven IOC sweeps and behavioral anomaly analysis.
- Perform phishing and email threat analysis — SMTP relay tracing, SPF/DKIM/DMARC validation, malicious URL analysis, attachment review — producing structured IOC reports and remediation guidance for customer stakeholders.
- Administer SIEM platforms: log onboarding, DSM/regex parsing, use case lifecycle management, license management, reporting automation, and backup/recovery across customer environments.
- Mentor junior analysts, develop runbooks and playbooks, and maintain internal knowledge bases to improve triage consistency and analyst onboarding efficiency.
- Automate triage steps using Python, Bash, and PowerShell — IOC enrichment pipelines, log parsing utilities, alert correlation — to reduce repetitive analyst workload.

Key Contributions:

- Supported QRadar platform upgrades and Netscout integration, maintaining detection continuity and validating alerting accuracy throughout transitions.
- Reduced phishing alert triage time by building a structured analysis workflow covering header parsing, URL detonation, and sender reputation enrichment, adopted across the team.

Student Trainee — Networking & Cloud Fundamentals Apr 2022 – Jul 2022
TechBoxx, Srinagar

- Troubleshoot network infrastructure (TCP/IP, DNS, DHCP, VLANs); performed Linux log review and basic performance diagnostics across cloud and virtualization environments.

SKILLS & TECHNOLOGIES

SOC & IR	P1/P2 Incident Response Threat Hunting L1/L2 Ticket Auditing Alert Triage RCA Documentation
SIEM / EDR	Microsoft Sentinel IBM QRadar Splunk Carbon Black Cloud Microsoft Defender XDR
SOAR & Scripting	Sentinel Playbooks IBM Resilient Python Bash PowerShell KQL AQL Basic SQL
Threat Analysis	MITRE ATT&CK; IOC/TTP Analysis Phishing & URL Analysis Detection Tuning False Positive Reduction
Cloud & Infra	AWS (EC2/VPC/IAM) Azure Network Security Log Source Onboarding Access Management
Frameworks	MITRE ATT&CK; NIST CSF ISO 27001 CIS Controls

CERTIFICATIONS

Splunk Core Certified Power User (SPLK-1002) — 2026
SC-200: Microsoft Certified Security Operations Analyst Associate — 2024
PCDRA: Palo Alto Networks Certified Detection & Remediation Analyst — 2024
Fortinet NSE Fundamentals — 2023 | StationX Cyber Security Course — 2023

PROFESSIONAL INTERESTS

Threat Detection Engineering • Security Automation & SOAR • SIEM Administration • Incident Response • SOC Quality & Governance • Cloud-Native Security Operations
